Project Summary

This natural gas fired combined cycle gas turbine plant is part of the Agios Nikolaos Energy Complex, with total installed capacity of 778MW.

The project has been carried out by METKA on full turn-key basis, and includes engineering, supply, erection and commissioning of a 430 MW (net output) combined cycle unit with auxiliary installations and 400kV GIS substation.

The scope of the project includes all necessary interfaces and integration with the existing installations of the Agios Nikolaos Energy Complex.

As part of its overall operations and maintenance scope for the Agios Nikolaos Energy Complex, METKA has also carried out the operation and maintenance (O&M) of the unit after completion.
