## Project Summary

METKA has carried out the full operation and maintenance (O&M) of the [Co-generation Plant](#) as part of its overall O&M responsibility for the Agios Nikolaos Energy Complex.

The co-generation plant is operated from the common control room of the complex together with the IPP unit.

Within its overall O&M responsibility, METKA has also undertaken the long-term maintenance contract for the two gas turbines type 9E with General Electric.
