

### Press Release

#### **A global First for MYTILINEOS: Flash Note of January 26th, 2023 for the financial results of 2022 will be presented in METAVERSE**

**Athens, Greece – January 23<sup>rd</sup>, 2022** – Staying at the forefront of global innovation, MYTILINEOS Energy & Metals (RIC: MYTr.AT, Bloomberg: MYTIL.GA, ADR: MYTHY US), on Thursday 26th of January, will publish its 2022 Financial Results Flash Note in Metaverse, using 3D visualization. Thus, it becomes the first company to use this tool to make such a presentation, showing the financial figures across the whole range of its activities and in such detail.

3D visualization is a tool that, though is now beginning to advance in international corporate presentations, has never being used before worldwide for financial reporting, that fulfills regulatory mandates and requires complexity, intricate details, and tight deadlines, such as reporting of a company's financial performance. This is a powerful tool that allows stakeholders to gain a deeper understanding of a company's financial performance in an easy-to-understand format and a more engaging and interactive experience for them. By creating an interactive and immersive experience, companies can easily communicate and highlight key areas of success and improvement. This virtual environment allows users to interact with the data in a way that traditional methods, such as spreadsheets and charts, cannot accomplish.

MYTILINEOS is one of the few leading companies in Europe to publish financial results for the 3rd consecutive year so early, promoting timely accurate information and transparency for all.
