Press Release

MYTILINEOS and Powerledger collaborate for clean energy tracking and smart sourcing

- *MYTILINEOS through Protergia in partnership with Powerledger is introducing energy provenance tracking and tracing features in Greece*
- *Protergia's consumers can easily trace and visualise where their energy comes from in near real-time, and track their carbon footprint granularly*
- *With Powerledger's technology, MYTILINEOS can get an onestop view of their and Protergia's clients' entire energy portfolio, including onsite generation, PPAs and GOs, offering an efficient way of meeting energy targets at a low cost.*

Athens, Greece – 17 April 2024 – [MYTILINEOS Energy & Metals](#) (RIC: MYTr.AT, Bloomberg: MYTIL.GA, ADR: MYTHY US) (**MYTILINEOS**) through Protergia, in partnership with [Powerledger](#) (POWERLEDGER) introduce energy provenance tracking and tracing features in Greece.

With the Powerledger platform, MYTILINEOS and Protergia's consumers can now track, trace, and visualise where their energy comes from in near real-time, and track their carbon footprint granularly. Simultaneously, they can take action on their energy consumption, shifting it to a time with a greener energy supply or investing in storage solutions. The platform can also help them make smarter procurement decisions, such as signing Power Purchase Agreements (PPAs) that contribute to a more hybrid energy portfolio, adapting better to their energy needs. As part of the partnership, the two companies are also delivering smart solutions like green energy tracking and price discovery for EV charging points.

The most important features of the MYTILINEOS – Powerledger partnership boasts several key features including the following:

- Allows consumers to trace, visualise near real-time energy using blockchain and AI.
- Provides MYTILINEOS to gain a deeper insight into customer behaviour, preferences, and energy demand patterns and generates a “carbon free energy score” to understand what percentage of the meter energy consumption has been matched with carbon free energy generation.

- Provides MYTILINEOS visibility over their entire energy portfolio, including onsite generation, PPAs and Guarantees of Origins (GOs).
- Enables 'time' and 'location' stamping of energy generation and consumption, allowing for a seamless transition to a 24/7 renewable energy system.

The Powerledger blockchain meticulously tracks and traces the supplied energy from its generation source to its point of consumption, from smart meter data. It ensures a secure and cost-efficient digital record of every supplied kilowatt-hour (kWh), delivering unparalleled transparency and accountability throughout the energy supply chain.

This partnership, utilising cutting-edge technology, underscores MYTILINEOS' commitment to innovation and sustainability, positioning the company as a trailblazer in the energy transition. Through this partnership, we are providing our customers with greater transparency.

About Powerledger:

Powerledger is a software company that has developed a blockchain-enabled renewable energy trading platform. Powerledger's technology is available across more than thirty projects in ten countries, uses blockchain, AI, and Web3 to solve pressing energy challenges and enabling customers to access and trade cheaper, cleaner electricity. Powerledger's software and features work alongside the existing infrastructure of energy systems, enabling greater control and ownership for consumers and producers alike.

Power utilities, governments, and large corporations use Powerledger's solutions to be at the forefront of energy transition by tracking, tracing, and trading every kilowatt hour of energy. Headquartered in Zug, Powerledger is recognised as one of the top 50 companies in Crypto Valley, Switzerland.
