

## **PRESS RELEASE**

### **The New Generation of Engineers Starts at METLEN – New Cycle of the “Engineers in Action” Program**

*METLEN’s pioneering paid internship program for young engineers*

***Applications: September 15 – October 20, 2025***

**Athens, Greece – September 15, 2025** – **METLEN** is once again inviting recent engineering graduates to join the **new cycle of its flagship “Engineers in Action”** program. **This one-year, fully paid internship** offers young engineers the opportunity to put their academic knowledge into practice in real working environments, serving as a high-level “school” of hands-on experience.

Following last year’s successful expansion, the program is being implemented for the **second consecutive year not only in Greece, but also in the UK and Italy**, offering participants valuable international exposure and perspectives.

In the United Kingdom, the program is now running for the second consecutive year, building on its strong legacy in Greece, where it has been established for over a decade as a benchmark initiative. Notably, all participating engineers have secured employment within three months of completion, with many joining METLEN in permanent positions. Over the years, more than 260 young engineers have taken part in Greece, with 125 still with the company today — a testament to the program’s long-term impact.

Through their participation, young engineers are called upon to tackle complex projects and develop skills that will serve them throughout their careers. As a result, **METLEN has become a reference point** for those seeking to take their first professional steps in a safe, promising, and inspiring environment. **Participant satisfaction** has consistently remained **above 90%**.

#### **Participants will have the opportunity to:**

- Work at one of the leading industrial and energy companies, with strong international footprint.
- Contribute to projects with global impact.
- Experience the dynamic world of industrial and energy operations through exciting projects.
- Build key skills in time management, presentations, MS Office, data analysis, artificial intelligence, and more.
- Receive guidance from experienced professionals and gain the tools to solve complex problems and deliver on demanding projects.

#### **Who can apply:**

The program is open to recent engineering graduates with up to 2 years of work experience. Additional requirements include:

- Strong academic background in engineering (Mechanical, Electrical, Civil, Chemical Engineering or related fields)
- Work authorization and residence in the UK, with the ability to join our London office
- Excellent command of English
- Demonstrated behaviors aligned with METLEN's values:
  - Personal growth
  - Focus on results and safety
  - Collaboration and trust
  - Empathy and effective communication
  - Flexibility and adaptability
